

RestoreTest

Relentless backup validation

Compliance, security and operational resilience – every day

Three critical challenges

Compliance pressure

NIS2 demands proof. You must demonstrate your backups actually work.

Backup blindness

Your backups exist, but are they tested? By crisis time, it's too late.

Sleepless nights

Can you restore your data when disaster hits?

Relentless validation – automated every day

- **Daily and relentless** – Tests every night automatically, without impacting operations
- **Evidence in storage** – Concrete proof ready for audits and compliance reviews
- **Intelligent probes** – Tailored precisely to your systems
- **Flexible integration** – Works with databases, file servers, Active Directory, Veeam
- **Scriptable solution** – If your backup system can be scripted, RestoreTest handles the rest

NIS2: From theory to practice

NIS2 requires:

- Documented backup strategy
- Regular testing
- Evidence for audits
- Fast incident response

✓ **RestoreTest** covers all this automatically

Operational stability – day after day

- **Proactive monitoring** – We check data integrity every single day
- **Increased operational security** – Fewer surprises, more predictability
- **Reduced recovery time** – When something fails, you know exactly where the problem is
- **You can recommend with confidence** – You know your backups work. Guaranteed.

Proven over 9 years – relentless and reliable

"It doesn't help having certifications if you don't control your data. RestoreTest gives us peace of mind because we know we have a working copy."

— Head of IT, Mogens B. Lassen, Envidan

- ✓ Relentless validation since 2016 – still going strong
- ✓ Handled thousands of checks
- ✓ Evidence clearly documented for compliance

What do you get out of it?

For IT operations

- Automation of tests
- Fewer fires to put out
- More development time

For management

- Reduced data loss risk
- Compliance documentation ready
- Peace of mind

For the business

- Resilience against cyber attacks
- Enhanced operational stability
- Reputation strengthened

How RestoreTest works

1

Every night: Automated testing

RestoreTest tests your backups without impacting operations.

2

Results stored automatically

You get proof your backup works – ready for audits.

3

If something fails: Instant alert

You're notified immediately to act before it becomes critical.

Simple and affordable implementation

What's included:

- Setup of your first 2 systems
- Works on-prem, hybrid or cloud
- Unlimited tests and validation
- Compliance reports
- Support and maintenance
